

Childcan has been there for us.

My son Luke was diagnosed with ALL Leukemia in July of 2015.

As a family this was devastating news. With time and education came awareness of the road before us. There were many long weeks in hospital with many different stresses. We were introduced to Childcan an association

which supports families like ours in a time of emotional and financial strain. With their help we were given financial help for our daily meals in hospital that were many. Along with the financial help, Renee our friend from Childcan gave us emotional support as well.

Luke has attended a London Majors game and got to go out on the field. As well we took the bus to Canadas Wonderland this summer as he was well at the time. We as a family had a blast and it was a much needed psychological “carrot” for him to look forward to as he waged his battle through the long winter. Both of these events were assembled for the kids with cancer by Childcan.

Laura Bloomfield

I cannot thank Childcan enough for their continued support.
